Summary

Self-motivated and technically adept full-stack developer with a strong foundation in data structures, backend services, and interactive frontend development. Trained through Scaler Academy and academic projects to build scalable and responsive web applications using Java, React.js, and Node.js. Adept at problem-solving, independent learning, and writing clean, modular code. Actively sharpening skills through hands-on projects and GitHub contributions.

Technical Skills

Languages: Java, JavaScript, SQL

Frontend: React.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB

Tools & Practices: Git, GitHub, Agile Methodology

Core Competencies: Data Structures & Algorithms, API Integration, Debugging, Version Control

Education

Scaler Academy – Full-Stack Development (08/2023 – Present)

- Specialized in JavaScript-based full-stack development using MERN stack.
- Built and deployed mini-projects simulating real-world scenarios. - Focused on writing efficient backend services and responsive UI.

BCA – Guru Gobind Singh Indraprastha University (10/2020 – 07/2023)

- Gained strong grounding in Computer Science fundamentals including DBMS, OS, Networking.
- Explored mathematics for computing: Discrete Mathematics, Linear Algebra.
- Completed academic assignments using SQL and Java for real-life simulations.

Experience

Software Development Intern (Freelance & Open Source) – 2023 – Present

- Built personal projects using React and Node.js to demonstrate end-to-end full-stack development.
- Improved UI/UX through clean CSS and responsive layouts.
- Practiced collaborative development through GitHub: version control, issue tracking, and feature implementation.

Personal Projects

📺 BookMyShow Clone (MERN Stack, JWT, TailwindCSS, Ant Design)

- Built a full-stack movie ticket booking application inspired by BookMyShow.
- Implemented secure JWT-based authentication and real-time show booking.
- Admin panel for managing movies, theatres, and showtimes.
- Modular React components and RESTful APIs using Node.js and Express.
- MongoDB used for dynamic data handling; responsive UI with Tailwind & AntD.

📺 **Movie App (React, JavaScript, Tailwind CSS, IMDB API)**

- Built a movie search platform with real-time data integration from IMDB API.
- Implemented search, filtering by rating, and dynamic watchlist using React state management.
- Optimized API request handling for a 40% faster search experience.

📌 **Kanban Board (HTML, CSS, JavaScript)**

- Designed a task management system with drag-and-drop and color-coded priorities.
- Users can add, remove, and filter tasks by priority levels.
- Clean UI layout developed with vanilla JavaScript and responsive design.
